DETAILED ACTION

Response to Amendment

This is a response to the amendments dated February 24, 2004 and March 30, 2004. Claims 1-11 and 35-37 are pending.

Election/Restrictions

1. Claims 1, 5 and 35 are generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 4, 7, and 10, directed to the alternate species are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

2. Claims 1-11 and 35-37 are allowed.
3. The following is an examiner's statement of reasons for allowance: the prior art of record does not show, singly or in combination, the combination of elements recited in claims 1, 5 and/or 35, including a method of blocking a tubular anatomical structure via grasping with an inflatable member on the interior of the tubular anatomical structure at one or more locations along the lumen and manipulating the structure to form an inverted folded tissue bundle of the tissue from around the circumference of the tubular

anatomical structure and applying a ligating structure to the tissue bundle. Newly cited references, St Goar et al. in US Patent No. 6,229,534 and/or Allen et al. in US Patent No. 6,626,930 do not show grasping with an inflatable member to form an inverted tissue bundle formed from the tissue from around the circumference of the tubular structure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
